

# Addition With Tens Sticks

Use the frames to add the numbers and identify how many you have in the tens and ones place. Then change your number sentence to show the tens plus the ones.

*Example:*

Lily had 4 toy cars. Avery gave her 9 more. How many did she have in all?

$$4 + 9 = \underline{13}$$

There is 1 ten and 3 ones.

$$\underline{10} + \underline{3} = \underline{13}$$

**Now you try!**

Leyna had 5 mushrooms. Ruby gave her 11 more. How many mushrooms did she have in all?

$$5 + 11 = \underline{\quad}$$

There is        ten and        ones.

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

# More Adding Practice

Use the frames to add the numbers and identify how many you have in the tens and ones place. Then change your number sentence to show the tens plus the ones.

**Example:**

Lily had 4 toy cars. Avery gave her 9 more. How many did she have in all?

$$4 + 9 = \underline{13}$$

There is 1 ten and 3 ones.

$$\underline{10} + \underline{3} = \underline{13}$$

**Now you try!**

Ahmed saw 7 butterflies. Naia saw 6 butterflies. How many did they see all together?

$$7 + 6 = \underline{\quad}$$

There is        ten and        ones.

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$
